A No-herding baseline
Theory using ρ_0
Theory using ρ_S
Simulation
Steady-state error δ_S
Initial whale share ρ_0
B Does the whale's wealth share change?
$h = 0$
$h = 0.5$
$h = 0.9$
$\rho_S = \rho_0$
Final wealth share ρ_S
Initial wealth share ρ_0
C Simulation minus corrected theory
$h = 0$
$h = 0.5$
$h = 0.9$
$\delta_S^{sim} - \delta_S^{theory}(\rho_S)$
Initial whale share ρ_0
D Price adjustment, $\rho_0 = 0.3$
Solid: simulation
Dashed: initial-share theory
$h = 0$
$h = 0.5$
$h = 0.9$
Price error $p_t - \eta$
Period
